

Isa Muyskens

FST

Recommending

Teacher: Erin Gardner

Isa is in an incredibly diligent, hardworking, focused student. Though the current content in FST is challenging, Isa never gives up. She is willing to put in extra time and effort in order to complete her work in a thoughtful manner, rather than simply rushing through to complete it. She will stay after class and into her lunch period in order to ensure that she understands a particular problem. Isa's work ethic and attitude toward learning is admirable and she is an absolute pleasure to have in class.

Maya Gunther

Statistics

Recommending

Teacher: Alysa Breyer

Maya is one of the most diligent, motivated and curious students I've ever had the pleasure of having in my class. She not only pushes herself to be the best possible student she can be, but pushes me to be a better teacher with her deep, thought-provoking questions. Maya consistently makes broad connections between large concepts while also striving to understand each individual topic completely. I feel very fortunate to have her in my class.

Benjamin Hollander-Bodie

Calculus

Recommending

Teacher: Brahim Khiraoui

Benjamin is not hesitant to take on challenging math problems and deduce solutions on his own. He is a positive contributor to the classroom learning environment, asks questions to advance the learning environment and has developed productive working relationships with fellow students during the class discussions. One thing that strikes me about Benjamin is that he is able to excel in independent work as well as working as part of a team. I am really impressed with ability to grasp broad concepts well.

Rakeyah Ahsan

Precalculus

Recommending

Teacher: Marcus Caimi

Rakeyah is a quiet student. She oftentimes avoids contributing to all-class discussions in favor of working in her small group. HOWEVER, she consistently earns daily credit participation points because she is one of the most helpful students in the room. Rakeyah cares about the material and is also found in my classroom after school asking question after question until she feels like she understands. She has even exclaimed that she “is definitely going to look at [her] notes when [she gets] back home, because that was a lot to take in today.” Rakeyah knows that only with hard work and perseverance, success will come and I’m incredibly proud of her.

Ali Yukesekkaya

Algebra II

Recommending Teacher:
Denise Lee

Ali arrived in Cambridge from Turkey one week before school started. He is a strong member of my 4th period HN Algebra 2 class, earning a solid A during first quarter. While the math comes easy to Ali, he must work hard to learn the vocabulary of mathematics. He is very determined to understand the concepts and does not give up until he does understand. Ali has a positive attitude, a smile on his face, and laughs easily. He is a delight to have in class.

Lerche Gomez-Henry

Geometry

Recommending Teacher:
Casey Leonard & Sandy Simeon

Lerche is a positive influence in our CP Geometry class. She always has a positive attitude as well. Lerche always completes her classwork and homework with care. She works cooperatively with all different types of students and often volunteers to go to the board. Lerche also contributes to a positive school culture by playing on the volleyball team.

Sagyan Aryal

Computer Science/Programming

Recommending Teachers:

Dr. Eric Wu & Elizabeth Atwood

Sagyan shows exceptional computer science skills. He makes his fellow students better by offering to help whenever he can. On top of doing all the CS honors projects, Sagyan make sure his programs exceed the course guidelines. He is also a joy to have in class.

Michael Thomas-Stewart

Algebra I

Recommending Teachers:

Laura Chiricosta & Josh Marden

Michael is a hard-working student in our Algebra I class. He is always on task and participating appropriately. Michael is a role model to other students in the room by helping them and answering their questions. His work and effort are paying off as he had the highest grade on our Quarter 1 Exam. We are hoping to move him into Honors in January.

Roxanne McHaffey

Math Reasoning with Applications

Recommending Teacher:
Ross Benson

Roxy has been a focused student from day 1 even as a bunch of her classmates have caught major cases of senioritis. She asks questions when she needs something clarified and helps others understand the material as well. Roxy goes beyond just doing the minimum and really wants to fully understand the curriculum.
