

**Bedilu Green**

## **Algebra I**

Recommending

Teachers: Tim Ogino &  
Kathleen McCormick

Bedilu is an extremely conscientious student who always tries his hardest in class. In Q2, while many students struggled with the more difficult material, Bedilu increased his effort to match and pulled his grade to an A- for the quarter, also performing admirably on the Q2 exam with a top 5 score in the class. In class, Bedilu is always on task and focused and willing to participate and answer questions. He collaborates well with his nearby peers and is always determined to deliver his best work on all homework, class work, and projects. He has also taken it upon himself to start coming after school on occasion for extra help.

# Kaitlyn Bono

## Geometry

Recommending

Teachers: Isabelle Philippe &

Kathleen McCormick

Kaitlyn is the true embodiment of the word “perseverance!” Day in and day out, she works through challenging problems with grit and determination. Even when the urge to give up festers, Kaitlyn manages to place it to the side and puts her mind to accomplishing any task. Kaitlyn wasn’t too sure how she would perform on the Quarter 2 exam but she went in determined to remain calm and do her best, earning herself a B! Her participation in Quarter 2 was also at an all-time high! One trait that I admire most about Kaitlyn is the positivity she exudes. She offers her peers such positive advice and encourages them to be and do the best they can. She’s our class inspiration, motivator, and cheerleader! There is no one more deserving of this recognition!

Jacobi Cline-Gates

## Algebra II

Recommending

Teachers: Chris Nemitz &  
Mike Murphy

Jacobi showed up each day prepared, ready to work and with a positive attitude. He completed all assignments and sought support when necessary, ahead of time. He actively participated in every lesson, asking good questions and answering others'. Jacobi engaged very well in group discussions and he helped others in the room when they were struggling – asking for nothing in return. Jacobi also has a healthy sense of humor. He is relatively new to Cambridge and has fit in very well in a short time. It was a true honor to work with this fine young man.

# Lucas Guzman-Finn

Computer Science/Programming

Recommending

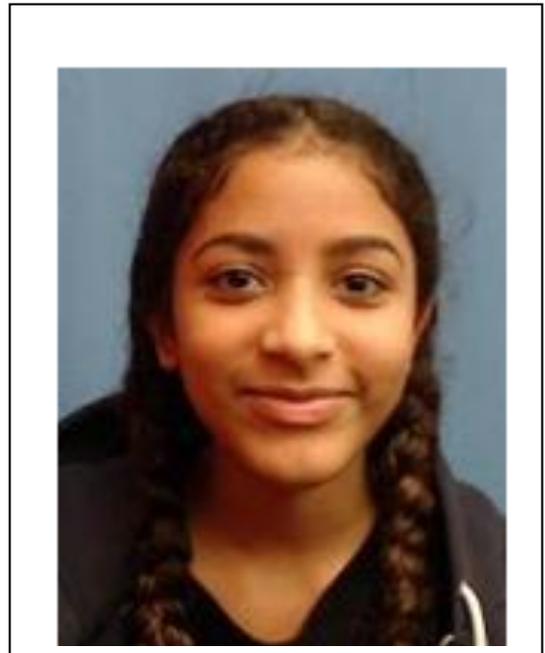

Teacher: Liz Atwood

Lucas has taken five computer science classes at CRLS and has scored in the top of the class in every one of them. He works through harder problems with patience. Lucas will always help his fellow classmates solve an issue. He contributes to a wonderful classroom with a positive attitude and a great sense of humor.

**Bianca Mercado**  
**Math Reasoning**  
**with Applications**

Recommending Teacher:  
Ross Benson

Bianca is one of the most cheerful and positive students I have had. She is also intelligent, hardworking, and self-confident. She goes far beyond just trying to be able to solve problems and instead tries to fully understand the material and its conceptual background. Bianca asks great questions, helps her classmates, and is an all around amazing student.

# Samerwite Mekonen

## Precalculus

Recommending Teacher:

Joe Nicholson

Samerwite was an excellent student and role in my class. She produced excellent work in her projects, homework, assessments and presentations.

Samerwite would also be the first to volunteer answers to challenging problems and come to the board to solve them. She came to see me after class whenever she did not fully understand the material we were working on. I was very impressed with her study habits and passion to learn, which made her top performer in the class... a very impressive feat given that she is also working on her English language skills.

# Kalilah Hall

## FST

Recommending Teacher:  
Erin Gardner

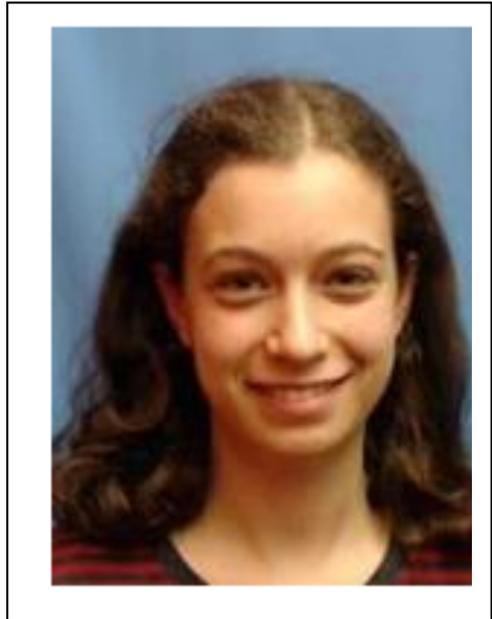

Kalilah was not only a top performing student in her class, but she also brought an incredibly pleasant attitude to class on a consistent basis. Kalilah collaborated in a helpful, supportive manner with her classmates. She often worked with classmates to persevere through more challenging problems, explained a concept or her problem-solving strategy to someone, and encouraged them to not give up. In addition, Kalilah could always be counted on to volunteer to show or explain her work to the class and to answer challenging, higher-level thinking types of questions. Kalilah served as a positive role-model for her classmates. Her efforts, attitude and math prowess were much appreciated and valued.

## **Zoe Levitt**

### **Statistics**

Recommending Teacher:  
Alysa Breyer

Zoe is the kind of student that terrifies me as a high school math teacher - she is gifted and so far advanced that I almost feel guilty teaching her. Even in my AP Statistics class, there was nothing that truly challenged Zoe; that makes her think deeply, that forces her to collaborate with others, that sparks her curiosity. Collaboration, to Zoe, simply means supporting her peers who don't grasp things as quickly as she did.

Lorra Marseille

# Calculus

Recommending Teacher:

Kate Sorenson

Lorra is an incredible student, person, and citizen. As a student, she is fiercely dedicated to her education. Lorra comes to school at 7:15am nearly every morning to check in with her teachers or review. For example, before the AP AB Calculus midterm, she came to three one hour review sessions and one after school review session. When I am not available for help, she attends office hours with Ms. Leonard, the other AP Calculus teacher. Because of her commitment and her natural math abilities, Lorra scored a 102% on her midterm and a 95.9% in the course for 2<sup>nd</sup> quarter. As a person, Lorra is special. There's no other way to say it. She is kind. She is generous. She is good humored. And she is hard working. She is willing to work with anyone and she is always positive. Everyone who meets Lorra adores her, and that admiration is well earned. In addition, Lorra is a tremendous citizen in our community and school. She is captain of the CRLS Volleyball team and she puts a tremendous amount of effort into student government as a junior class representative. I am very proud of all that Lorra has accomplished at CRLS, but I am more even in awe of the incredible person that she is.
