

**VENDING MACHINES IN THE CAMBRIDGE PUBLIC SCHOOLS
STUDENT ACCESS AND NUTRITION**

All foods sold in the Cambridge Public Schools shall meet nutritious guidelines to support a healthy environment for learning and reflect the principles taught in nutrition lessons. Consistent with this goal, the foods and beverages in the vending machines shall provide students with healthy choices. Although a healthy diet has room for occasional high fat, high caloric, low nutrient foods; foods in the school setting shall be consistent with healthy guidelines and model good choices for young people. The district shall adhere to these practices and procedures in all food and beverage vending machines accessible to students.

Adopted: June 15, 2004
